

## LG-MS Safe Routes to School Cool Cat Walk & Roll Program

Dear Parents,

Los Gatos-Monte Sereno Safe Routes to School and the Daves Avenue Safe Routes to School Committee (SR2S) encourages students to use People Power to school with Cool Cat Walk & Roll Program. This exciting program uses technology to motivate students to walk, bike, roll and carpool to school, which reduces traffic congestion and provides a healthier environment for our school and community.

Registration for the barcode card is simple. Help your student complete the permission slip and return it to the office. Barcode cards will be delivered to their classroom. If they need a replacement, please fill out the permission slip and mark the box for replacement.

**By signing below, you and your student agree to participate in this program. You are giving your permission for your student (named below) to register for the barcode system and to receive a personalized (Cool Cat Barcode\*) card. You, as the parent, are the judge of the best and safest way for your child to commute to school on any given day.**

Contact Karen Briones at [kbriones@lgusd.org](mailto:kbriones@lgusd.org) or Meaghen Spencer at [meaghen.spencer@gmail.com](mailto:meaghen.spencer@gmail.com) with questions.

My child has permission to participate in the SR2S barcode automation system, including receiving a personalized barcode card.

One form per student

**People Power includes walking, biking, skating, scooting, etc. The two primary objectives of the SR2S program are to both reduce traffic around the school and encourage healthy habits like walking or riding to school when safe. For those families and those times where driving is necessary, we will be including other methods of getting to school that are in line with the SR2S objectives - e.g.: car pooling, use of safe drop off points away from the school, etc.**

**\*The barcoded card is a laminated paper card about the size of a business card with a personalized QR code. When scanned with a device outside our program, only a student name appears. No other identifying information is available. The program utilizes a SR2S developed application that is run on an Android device. No information is stored on the device. All scanning uploads to a password protected site managed by SR2S and made accessible to the school site. Participation is voluntary. The student may print their name on the card to make it easier to identify. It is the student's responsibility to bring their card with them to be scanned on the appropriate days.**
