

## Blossom Hill Safe Routes to School Honey Bee Barcode Form

Dear Parents,

The Blossom Hill Safe Routes to School Committee (SR2S) encourages students to use People Power to school with the Honeybee Barcode Program. This exciting program motivates our students to walk, bike, roll and carpool to school, which reduces traffic congestion and provides a healthier environment for our school.

Registration for the Honeybee Barcode card is simple. Help your student complete the permission slip and return it to the office. Barcode cards will be delivered to their classroom. Students who registered last year will receive an updated card at the beginning of the year. If they need a replacement, please fill out the permission slip and mark the box for replacement.

**By signing below, you and your student agree to participate in this program. You are giving your permission for your student (named below) to register for the barcode system and to receive a personalized (Honeybee Barcode\*) card. You, as the parent, are the judge of the best and safest way for your child to commute to school on any given day.**

Contact Lisa Reynolds at [lreynolds@lgusd.org](mailto:lreynolds@lgusd.org) or Kathleen Willey at [saferoutes@blossomhill.org](mailto:saferoutes@blossomhill.org) with questions.

My child has permission to participate in the SR2S barcode automation system, including receiving a personalized barcode card.

One form per student

People Power includes walking, biking, skating, scooting, etc. The two primary objectives of the SR2S program are to both reduce traffic around the school and encourage healthy habits like walking to school when safe. For those families and those times where driving is necessary, we will be including other methods of getting to school that are in line with the SR2S objectives - e.g.: car pooling, use of safe drop off points away from the school (such as the BH Park drive through on Shannon), etc. In addition, if your family has a signed Parent Driver Form on file at the school you have already committed to do what you can to make the environment around the school safer and healthier for our students, which automatically qualifies your student to be counted as a SR2S People Power user.

\*The barcoded card is a laminated paper card about the size of a credit card with a personalized QR code. When scanned with a device outside our program, only a student name appears. No other identifying information is available. The program utilizes a SR2S developed program that is run on an Android device. No information is stored on the device. All scanning uploads to a password protected site managed by SR2S and made accessible to the school site. Participation is voluntary. The student may print their name on the card to make it easier to identify. It is the student's responsibility to bring their card with them to be scanned on the appropriate days.
